

H11 Newsletter

Table of Contents

- 1. Project Statistics**
- 2. Changes in how a project administrator can view your results**
- 3. H11 in the news**

1. Project Statistics:

Combined GEDCOMs Uploaded	49
DISTINCT mtDNA Haplogroups	17
Family Finder	257
Maternal Ancestor Information	301
mtDNA	327
mtDNA Full Sequence	317
mtDNA Plus	324
mtDNA Subgroups	22
Total Members	359
Unreturned Kits	14

Within the study group we have members in every sub-haplogroup except H11a5. I will not do a breakdown of the various groups in this newsletter. Specifically, I will do that in Issue 1 of each year.

- 2. Changes in how a project administrator can view your results**
FT DNA has upgraded their access to accounts so that the default is Group Access only. If you wish to have your results included in the project then you must grant Limited Access to the Administrator. Minimum access means that I can not see any earliest ancestor information that you may have added to your project.

3. H11 in the News

Ian Logan has an extensive list of Haplogroup H11 where the samples have been uploaded to Genbank on a website (up to the end of April 2019):

http://www.ianlogan.co.uk/sequences_by_group/h11_genbank_sequences.htm

This site lists all of the mutations for the submitted samples. Members of H11 may find this site very interesting.

Any submissions to this newsletter can be submitted to Elizabeth Kipp (kippeeb@rogers.com).
