

H11 Newsletter

Table of Contents

1. Project Statistics

2. H11 in the news

1. Project Statistics:

Combined GEDCOMs Uploaded	52
DISTINCT mtDNA Haplogroups	18
Family Finder	360
Maternal Ancestor Information	424
mtDNA	477
mtDNA Full Sequence	470
mtDNA Plus	475
mtDNA Subgroups	24
Total Members	517
Unreturned Kits	20

The change in the Statistics is five people have upgraded to mtDNA Plus. I do not know who they are but it will become obvious when I do the yearly assignment to the subclades that the data points to.

2. H11 in the News

I have returned to my work regularly these days after a year of careful use of my new lenses in my eyes and I can say that I have rewarded with these new lenses and an absolutely fantastic vision considering what I had for 78 years. Highly recommend cataract surgery but I do think you need to really listen to the attending surgeon carefully and follow his/her advice.

WikiTree has an interesting article on their site:

https://www.wikitree.com/wiki/Category:H11b1_FS_mtDNA_Haplogroup

This weblink above contains person profiles from the past noting as far back as the 1700s that carry H11b1 which could be of interest to members of this project.

Unfortunately most of the information that I find doing searches is limited to my own newsletters.

3. Any submissions to this newsletter can be emailed to Elizabeth Kipp (kippeeb@rogers.com).

The next newsletter will include a breakdown of the subclades by me and hopefully published the 1st of February 2026 as this newsletter is definitely late this time.
